

CGA Emergency Management Services to Support Franklin County in Response to the Deepwater Horizon Oil Spill

FRANKLIN COUNTY, Fla., May 14 /PRNewswire/ -- Franklin County Board of County Commission in the Florida Panhandle has secured the services of Calvin, Giordano & Associates (CGA) Emergency Management Services Division to assist in their response to the Deepwater Horizon oil spill, which is closing in on the U.S. Coast.

Franklin County is located in Florida's Northwestern Panhandle, southwest of Tallahassee, the State capitol. A main focus of the response developed will be to protect and preserve the coastal and estuary waters and the critical ecological and economic resources they provide.

CGA's Emergency Management Services Division provides local governments with a comprehensive approach to disaster response. These services included finance, logistics, operations and planning support. CGA's staff brings solutions to this challenging and ever changing event by providing highly trained subject matter expertise to our clients.

The scope of services to be provided by CGA, include:

- Provide subject matter expertise in Hazardous material operations
- Coordinate and support response and recovery operations as necessary
- Provide personnel to assist in Logistics, Operations, Finance and Planning
- Provide responsible party paperwork preparation and record keeping
- Identify needs and implement programs and/or corrective actions to enhance performance
- Provide engineers, general contractors, and other trained personnel to offer monitoring and support services
- Provide surveying and mapping services
- Provide data technologies and development services
- Provide other services as directed by Franklin County Emergency Management.

"We are privileged to be a partner with Franklin County in their efforts to protect this valuable resource" said Dennis Giordano, CGA President.

CGA (www.calvin-giordano.com), headquartered in Fort Lauderdale, Fl, is a multi-disciplinary professional consulting firm that offers a comprehensive approach to engineering, land planning, government regulatory compliance, public sector contract services, data technologies, emergency management and developmental issues.
