

GIS PARCEL BASE MAPPING Greenacres, Florida

Client
City of Greenacres

Project Date
2007 - Ongoing

Services Provided
GIS

For the City of Greenacres, CGA updated a large number of maps with the most accurate and current data available. We created a model mapping the historical areas annexed into the City of Greenacres, from 1947 to present. All data was checked and adjusted to ensure spatial and topological accuracy. Comprehensive Plan maps were also updated to represent the most recent data. After updating, all data was documented with its purpose, limitations, and intended use to be integrated into the city's existing Geographic Information System.
