

MAPPING AND ANALYSIS FOR EVALUATION AND APPRAISAL REPORT (EAR) AND EAR-BASED AMENDMENTS

Surfside, Florida

Client

Town of Surfside

Project Date

2006 - 2009

Services Provided

GIS

Calvin Giordano and Associates was contracted by the Town of Surfside to work on the EAR based amendments. This project had CGA staff working closely with planners and Town staff to update all relevant layers and maps associated with the EAR. These elements included such maps as Future Land Use, Existing Land Use, Flood Zones, and all Transportation elements. After updating all the relevant layers, CGA GIS staff ran analysis to determine acreages and percentages of land uses for the planners. The functionality of GIS assisted the planners in completing their elements of the EAR report in a timely and accurate manner.
