

VERIZON SWITCH STATION/ TAFT STREET AND US#27 Pembroke Pines, Florida

Client

Marks Brothers Inc/
Duffey Construction

Project Date

May 2008 - Present

Services Provided

Surveying and Mapping
Construction Engineering
Inspection
Environmental Services

Verizon Wireless has building data centers at various sites around the U.S. to meet increased demand for web hosting. CGA is currently providing surveying services for a Verizon Data Center being constructed in the City of Pembroke Pines. This site will help boost wireless signal and handle the huge amounts of data being sent via internet. The main contractors for whom CGA is doing work are Duffey Construction who is in charge of the building portion of the job and Mark's Brothers Inc who is responsible for site development. CGA's surveying and mapping department has been in charge of quantifying demucked material prior to any construction, all construction layout, as-built, and final surveys. In addition to Surveying and Mapping, CGA has provided Construction Inspection and Environmental Services on this job.
